

Negroes Given Death Penalty Ashdown Trial

Jury Finds Two Negroes Guilty In 18-Minutes Deliberation.

IS FINAL VERDICT

A Third Negro To Go On Trial Next Monday Morning.

ASHDOWN, Jan. 16.—John Green and Mack Brown, negroes were sentenced to die in the electric chair following conviction by a jury in Little River county circuit court, Wednesday on a first degree murder charge in connection with the slaying of Bud Morgan, 50, near Foreman December 22.

The jury deliberated only 18 minutes after attorneys for both the state and defense had waived argument, one of the most unusual circumstances ever to take place during the trial of a first degree murder charge in Arkansas.

Attorneys for the two negroes, S. C. Reynolds and Odie Gilleyen, announced that no move would be made to obtain a new trial and that the convictions would not be appealed. The attorneys were appointed by the court to defend the two blacks, who were without funds.

There was no demonstration in the packed courtroom as the verdict was returned, Judge B. E. Isbell having issued a stern warning just as the jury filed in that any demonstration would not be tolerated. Neither negro showed emotion as the death sentence was announced.

Brown and Green were tried for the murder of Morgan although they both were charged in a second indictment with the murder of Ed Dubley, 25. The second charge will not be pressed.

Third Faces Trial
A third defendant, Bud Nolan is to go to trial on a similar charge next Monday. His death will also be asked by Prosecuting Attorney John J. DuLaney.

The bodies of Morgan and Dubley were found in a field nine miles southeast of Foreman December 23. The bodies had been slain with an axe and the bodies had been robbed.

The highlight of the trial came with the placing of the two defendants on the stand late in the afternoon by the defense attorneys to tell what each claimed was a correct account of the slaying and to throw themselves upon the mercy of the jury.

The procedure, novel in south Arkansas courts, was at the request of both negroes. Before being brought into the courtroom they asked their attorneys to allow them to go on the stand and tell their stories.

Business Training Taken By Employee

Mrs. D. M. Stewart, cashier at J. C. Penney's Hope store, has just completed a business training course given by the headquarters of this chain of stores. She received her diploma today. This business training course has been arranged and prepared by the J. C. Penney company, and is given to employees who care to pursue the course of study, which requires several months of spare time.

Willie Walker Returned Today

Will Be Taken To Memphis Tonight For Further Questioning.

MARKED TREE, Jan. 16.—(AP)—Willie Walker, 32, charged with the murder of Miss Lena Waugh 35, divorcee, was returned here today from Phoenix, Ariz., by Sheriff A. H. Landers, of Pinal county.

Walker was detained at Phoenix on suspicion when he attempted to sell at a very low price the automobile, which has been identified as that of the murdered woman.

He will be taken to Memphis tonight for further questioning, the sheriff said.

Columbus Girl Burned To Death

Clothing Catches Fire When She Stood In Front Of Fireplace

Janie Hawthorne, seven-year-old daughter of Mr. and Mrs. George Hawthorne, residing one mile south of Columbus died today at noon from burns she sustained late yesterday afternoon when her clothing ignited while standing in front of the fireplace at her home.

Screams were heard by the parents who were in another room and they rushed to the aid of the small girl, and extinguished the flames. Medical aid was rendered, and it was thought by attending physicians that the child would live, although her case being considered serious.

Four Die In Pay Car Riddled by Blast

Desperadoes who dynamited a mine pay car on a mountainside near Wilkes-Barre, Pa., killed four men and injured six at the scene pictured here in a futile attempt to steal a \$35,000 payroll, became the object of a widespread search throughout the east. The photo shows how the car was literally blown to splinters by a powerful charge of dynamite set off by a wire which ran several hundred feet away to a barricade occupied by the bandits. The bandits were driven away before the payroll was obtained.

Buildings Shake In Little Rock Today

Gas Explosion Damage Estimated To Be Approximately \$40,000.

LITTLE ROCK, Jan. 16.—(AP)—A gas explosion today shook the four-story story Donaghey office building and probably fatally injured a negro junior.

The explosion occurred today shortly after 5 a. m. when the negro janitor, James Cowan, attempted to start a fire in the furnace. It is believed he allowed too much gas to escape before applying a match to it.

The blast throwing him against the brick wall with a terrific force. He was immediately discovered, and taken to the General Hospital where his recovery is said to be doubtful.

The explosion was loudly heard, and buildings a half a block away were shaken by its force. The windows in the first floor of the building were broken, sending flying glass far into the seventh street.

The damage caused by the explosion today was estimated to be approximately \$40,000.

Will Try To Raise Jackson Bayou Levee

HELENA, Ark., Jan. 16.—(AP)—A group with levee equipment, a group of men dispatched to Jackson Bayou levee, six miles of DeWitts Bluff left today at noon to begin what is considered almost a hopeless task to raise the levee two feet before next Wednesday.

The necessity of raising the levee was learned when White river predictions indicated a crest of 32 feet would reach Jackson Bayou by January 22.

Senate Votes To Retain Tariff on Imported Sugar

WASHINGTON, Jan. 16 (AP)—The Senate today voted to retain the tariff on sugar imported into this country. They adopted the proposal of Senator Harrison, Democrat of Mississippi.

Duty on Cuban sugar is set at 1.75 cents and that imported from other countries at 2.25 cents per pound, at the present time. The finance committee proposed to raise the tariff to 2.10 and 2.75, respectively and the house provided duties at 2.4 and 3 cents per pound respectively.

Local Druggist Is Confined To His Home

John P. Cox, local druggist, has been confined to his home for a past week with an infected ankle. A box, falling upon his ankle, had scratched it in some manner, and an infection was the result. He is expected to return to the store within a few days, however.

Cooter Man Buried By Panther But Lived To Tell Of Adventure

COOTER, Mo., Jan. 16.—N. R. Hudgens, life-long resident of Pemiscot county, widely known as a hunter in the days when this country was little more than a wilderness, relates some thrilling experiences of years ago.

In the winter of 1896 he and Jim Smith were hunting in 14 Bend. Some time after midnight they became tired and stopping to rest, soon fell asleep. About an hour before daylight Mr. Hudgens was awakened by something raking leaves over them. Thinking it to be an old trap, they of that section playing a joke on them he thought he would let him finish before making any move.

As he opened his eyes the moon was shining through hazy clouds and he could see a creature that resembled a dog more than a man. It would stop occasionally, recline on its haunches and look about. When it had covered them up, except their faces, it backed up about ten feet and viewed the work it had done, and then sneaked off through the cane.

Mr. Hudgens aroused his companion and told him they had been covered up by the largest dog he had ever seen. However, when they found their dog had left, they surmised it was some wild animal that had been their visitor. Getting their guns, they waited, and in about ten minutes an old panther and four others came up. They fired, killing four, but several others that had followed escaped.

Apparently the old panther covered them up and then went to get the others for the feast.

Forced Jump Gives 'Flat Spin' Theory

FORTLAND, Ore., Jan. 16.—(AP)—The presence of a wing displayed by C. G. Barnum, Portland commercial pilot, has shown him what happens in the dreaded "flat spin."

In such a spin, says Barnum, the tail surfaces become the axis. The wings cut edgewise through the air, and with no control upon the alleron surfaces the pilot cannot bring the ship out.

"In a plane test, Barnum ascended 3,000 feet and deliberately put the ship into a tail spin. With a bag of sand in the front cockpit instead of a co-pilot, Barnum said, the machine was too evenly balanced and went into a "flat spin" instead of whirling nose downward.

Barnum stayed for 14 whirls to see what was happening, then jumped at 500 feet. The falling plane shot so close beside him that it nearly struck him.

School In Lonoke County Destroyed

Loss of \$14,000 Caused By Fire in Caney Creek Community.

LONOKE, Jan. 16.—Fire, believed to have started from a defective flue, yesterday afternoon destroyed the Caney Creek consolidated school, 10 miles south of here, loss was estimated at \$14,000 and was partially covered by insurance.

The Caney Creek school is the oldest consolidated school in Lonoke county.

Lineolum History Told To Kiwanis

Motion Picture Demonstration Given Club at Thursday Luncheon

Lineolum, their history and methods of manufacture, were the subject of an interesting mercantile display today noon at the weekly luncheon meeting of Hope Kiwanis club, held at Hotel Barlow.

R. V. Hendon, who was in charge of the program, introduced representatives of the Armstrong Lineolum company who gave a two-reel motion picture demonstration of how lineolum floor covering is made. The lineolum display was part of a special demonstration during the visit here of the big Armstrong traveling coach, which is stopping this week at Hope Furniture company.

Frank May, district trustee of Kiwanis club, made a report on his recent trip to the tri-state Kiwanis convention at Kansas City, January 13.

The club announced that plans have been completed for the holding of Kiwanis Ladies Night at Hotel Barlow next Thursday, January 23.

Texas Producers In Oil Price Clash

Humble Begins Battle With Heavy Cut; Others Follow.

HOUSTON, Texas, Jan. 16.—Texas oil producers will suffer a loss in income of nearly \$200,000 per day as the result of a slash in the price of crude announced Wednesday by several major oil companies.

The clash was started by the Humble Pipe Line company, which posted reductions ranging from 25 to 41 cents per barrel for crude from all Texas fields.

Late Wednesday, they were followed by the Gulf Refining company, the Texas Pipe Line company and the Sinclair Pipe Line company.

Prices of north Louisiana crude were cut from 22 to 25 cents per barrel by the Texas company after the Humble company cut the price in that field.

Whether the Sun company will follow the cut will be decided today, according to J. Edgar Pew, president of the company. Officials of the Magnolia Petroleum company also reserved decision.

The daily average production in Texas for the week ending January 11 was nearly 750,000 barrels daily. An average of 25 cents per barrel, therefore, will mean a loss of more than \$50,000,000 per month to producers. No reason for the cut was given.

Five In Burglary Case Are Taken To Malvern

TEXARKANA, Jan. 16.—Five persons, three of whom are women, have been taken to Malvern and are accused of the robbery of Ketchum's store at Glenwood. They are: J. W. Bradley, aged 20, J. A. Massey 17, Mrs. Lola Morgan, 45, her daughter, Irene Morgan, 15, and Eunice Entrepren, 20. Goods to the value of \$100 found in a car used by the two youths and the three women, are said to have been identified as having been taken from the Glenwood store.

All five were chased through Bowie county, Tex., and were captured Saturday night at Sulphur Springs, Tex. They are said to have been peddling stolen goods. They agreed to return to Arkansas without the formality of extradition papers.

Louisiana People Back Henderson

Sign Petition Addressed To Federal Radio Commission.

FARMERVILLE, La., Jan. 16.—(AP)—About 100 citizens, including city and parish officials, signed a petition addressed to the Federal Radio Commission at Washington asking that the license of W. K. Henderson's radio broadcasting station KWKI at Shreveport be renewed and that his present clear wave length be returned.

Those who signed the petition said they desired the station maintained as a Louisiana industry and also that the frequency of the air might be maintained in favor of the station.

The movement was headed by C. Reburn, clerk of court; P. W. Murphy, sheriff; W. B. Miller, town alderman; Harvey G. Fields, member of the Louisiana Public Service Commission, and J. W. Pickle, assessor. All merchants of the community also affixed their signatures to the petition.

Signers of the petition also formed a dollar club and sent a contribution to the Henderson station as a fund by which he may continue his fight for retention of the present wave length.

Mr. Henderson has attracted widespread attention by his outspoken remarks directed at chain store systems, and has been attacked on the floor of the Senate for alleged use of profanity in the air.

Country Suffers Damage From Cold and Floods

Rocky Mountain Region Gripped By Coldest Weather This Winter.

QUAKE ON W. COAST

Buildings Rock, and Flag Poles Sway In Southern California.

(By the Associated Press)
An earthquake in southern California, cold waves in the northwest and Rocky Mountain region and extending into the middle west and south, shows what nature has done to the United States within the last 24 hours.

Buildings rocked, flags swayed in Portonia and along the San Bernardino valley in southern California.

More than five hundred families were forced to abandon their homes as a result of the swollen, raging Washburn river at Vincennes, Ind., and at Attowa, Ohio, two hundred people were rescued from windows when the Blanchard river went beyond its banks.

Cold from the northwest swept through the Mississippi valley today causing much suffering to human beings and livestock. Rivers are outside their banks in the lower valley, and constituted a great area of ice and slush.

Cold at near record marks were reported in the Rocky Mountain district. Six lives were said to have been lost due to the cold which has gripped this territory. The cold extending into the south is expected to save the country from bad floods.

Mary Pickford Wins Inheritance Tax Suit
LOS ANGELES, Jan. 16.—(AP)—Mary Pickford, screen actress and wife of Douglas Fairbanks, film luminary, has successfully contested the state superior court's attempt of the state to collect \$90,284 inheritance tax on the estate of her mother, Mrs. Charlotte Pickford-Smith.

Mrs. Pickford contended that the \$23,284 tax already paid by her as executrix of the estate was all the state legally was entitled to, because \$780,000 of her mother's estate was a trust fund she had created out of her earnings as an actress. Mrs. Smith's estate aggregated more than \$1,000,000.

Superior Judge Harry Holzner returned a verdict in the actress' favor after an hour of deliberation.

American Women Refuse Long Skirts

May Make Paris Creators Change Their Mind.

PARIS, Jan. 16.—Despite the efforts of well-meaning style pacifists to effect a compromise, the War of the Skirts is still on.

The hardest blow struck so far against the determined band of Paris dressmakers, entrenched in the rue de la Paix in face of the whole world is the refusal of American women to buy long dresses. If the Paris dressmaking field-marshal is ever hard hit, it will be through their bank accounts.

French women have rather meekly accepted the dictates of the rue de la Paix, and the theatre floors at the Opera and elsewhere have never been swept so shiny as since trailing skirts came back into fashion this winter. Spain too listened peacefully and Spanish women cavort around in fluffly ankle-length skirts.

But American and British women took up the fight and for once in history they may make the Paris creators change their minds. In fact, if the battle goes on long enough the Anglo-Saxon sisters may break Paris' dominance in style matters.

The Paris creators realize that well enough and it is possible that they may change their tactics. They may be content for one year with a partial victory, long skirts for the evening and short skirts for the rest of the day.

From all over America, the trade is sending in warning signals. San Francisco dealers admit that long skirts have their favorites there, but Chicago, Denver and Salt Lake City report that long skirts are almost impossible to sell, and that the women there still insist upon the freedom of the knees.

Jim Bearden Gets Enumerator's Job
Announcement of the appointment of Jim Bearden, of Hope, as a census enumerator for distributors and manufacturers, was made today by J. Warren Stevens, district census supervisor, of Texarkana.

The canvass of distributors and manufacturers is made by the federal government prior to the census of population. Mr. Bearden's work began at once, and the gathering of the population census will follow later this spring.

In Search for Enforcement Solution

With Congress faced by recommendations for rapid changes in prohibition enforcement machinery, these men are figuring in the preliminary maneuvers of the forthcoming legislative battle. A report on prohibition has been submitted by the administration's law enforcement commission, headed by George W. Wickersham, upper left. A unified border patrol for land and sea was urged in an official letter from Secretary of the Treasury Andrew W. Mellon, upper center, while Prohibition Commissioner James M. Doran, upper right, has notified a House committee that it would be unwise to appropriate more than \$15,000,000 for his bureau because of existing congestion in the federal courts. Senator Wagner of New York, lower left, introduced a resolution to ask the Wickersham commission where present prohibition laws are enforceable, and a bill to transfer investigation and legal phases of prohibition violations from the Treasury to the Department of Justice has been drafted by Representative William Williamson, lower center, of South Dakota. A larger prohibition enforcement staff and increased enforcement aid from the states has been urged by Attorney General William D. Mitchell, lower right.

Phone Company To Spend \$2,300,000

Will Be State's Part of Southwestern's Expansion Program In 1930.

Construction plans for the Southwestern Bell Telephone Company for Arkansas call for an expenditure of approximately \$2,300,000 gross in 1930. E. N. McCall, district manager of the company, announced yesterday.

This is a part of the construction program for the five states in which the Southwestern operates—Arkansas, Missouri, Kansas, Oklahoma and Texas. The program will require an estimated expenditure of approximately \$52,000,000 during 1930, which exceeds by nearly \$12,000,000 the construction expenditure for 1929.

The Arkansas budget exceeds by about \$300,000 the construction expenditure in the state for 1929. Increased use of the telephone and the necessity of providing for an expected increase in the number of telephones during the year make the expenditure necessary. The company now serves 78,500 telephones in Arkansas.

New buildings is one of the major items in the 1930 budget. Telephone offices will be erected at Magnolia, Nashville and Morrilton. Extensions to the present building will be made at Hot Springs. An unattended dial office, which requires only periodic visits for inspection will be opened in Park Hill, Little Rock.

The building of new long distance circuits, extension of telephone lines in exchanges where growth demands additional telephone facilities, new switchboards, and associated equipment, purchase of new telephone instruments, are the other items of expenditure in the 1930 program.

"Pint" Terms Are Commuted By Gov.

Michigan Makes Amends for "Life for a Pint" Enactment.

LANSING, Mich., Jan. 16.—The state of Michigan yesterday made belated amends for its "life for a pint" law, under whose provisions six persons were sentenced to life imprisonment for violation of the state prohibition act.

Gov. Fred W. Green commuted the sentences of the five victims of the law still behind the bars. His action reduces their sentences from life imprisonment to a term of 7 1/2 to 15 years.

Mrs. Etta Mae Miller, mother of 10 children, and Fred Palm, both of Lansing, won world-wide notoriety from the publicity given their cases. The 1929 Legislature modified the law.

Mrs. Miller, who was sentenced Dec. 31, 1928, was the first woman victim of the law, while Fred Palm, who has been in Jackson prison since Sept. 29, 1927, was the original "pint of gin lifer." All of Mrs. Miller's four convictions were for liquor violations, but Palm had been previously convicted on other crimes. Mrs. Miller's case has been appealed, and will be argued before the supreme court Thursday.

Nitrate Speaker To Be Here 28th

D. H. Boyd To Talk At City Hall On "Feeding Cotton."

Farmers and others interested in new agricultural methods will hear D. H. Boyd, well known fertilizer lecturer, deliver his famous address on "Feeding Cotton," at Hope city hall Tuesday afternoon at 2 o'clock, January 28.

Mr. Boyd, who is an agronomist for the Chilean Nitrate of Soda Educational Bureau, spoke some time ago at a Rotary club luncheon here. He was enthusiastically received, for a speech which explained fertilizer principles in clear and simple terms. He has spent the greater part of his life experimenting with cotton fertilizers. This background of experience, linked up with Mr. Boyd's simple and forceful method of getting results in his public appearances, make him an instructive and interesting speaker.

Two Levees Break In Mississippi Flood District

Waters From Cold River Spread Over Thousands of Acres.

CONVICTS AT WORK

Work Day and Night Shifts In Effort To Hold Embankments.

MEMPHIS, Tenn., Jan. 16.—(AP)—Rain which has fallen in two states of the lower Mississippi valley for the past several days today, caused the smashing of a gap in the levee at Lambert and at Mack, Miss., spread over several thousands of acres of lowland, in the county of Quitman.

In Arkansas, the St. Francis river topped the bank in Green county and one-half mile north of Berling. Approximately nine thousand acres of farm land was in its path. Water pouring through a crevice and over the top of the embankment.

Thirty men, under the supervision of a U. S. levee inspector today, are making efforts to stop the flow of water by means of sacking. One hundred convicts from the state farm at Tarchman are at work at the break near the Jamerson plantation where the Cold river spread over its embankment and also forced a gap in the levee. The convicts have been working in day and night shifts in what proves futile to hold the embankment. Quitman county prison farm is in the area threatened by the raging waters.

CLARKSVILLE, Miss., Jan. 16.—(AP)—The break in the Cold river levee at Marks and Lambert, Miss., has been checked, said M. W. Martimer, druggist, in a long distance telephone message to Clarksdale shortly after noon today.

Boys Warned Not To Shoot Rifles In City

Complaints have come to this office that 22 rifles are being shot in various sections of this city. Yesterday a 22 caliber bullet crashed through the window of Mrs. Carri-gan's home, when a small boy shot at a pigeon flying in the air.

In today's issue of the Star is a notice from Mayor Boyett warning the boys against the shooting. Parents should take precaution to see that their children take no part in the firing of rifles in the thickly populated area of Hope.

Eielson Reported To Be In Siberia

Long Search Comes To An End for Lost Flyers.

MOSCOW, Russia, Jan. 16.—(AP)—A report has been received that C. B. Eielson and his mechanic, L. Boreland, were near the river Angara, Siberia, was received by the Soviet government today. The government ordered dog sleigh expeditions to the place.

Eielson and Boreland, who have been missing since November ninth in the Arctic, have been the center of a long search by Canadian and American nations. In recent weeks the Soviet government took up the search in view that the two flyers were on an air trip exploring the region along North Cape, Siberia, and believed they had been forced down along that coast.

Coldest Snap of Winter In Rockies

Snow and Zero Temperatures Extend Down In North Texas.

DENVER, Col., Jan. 16.—(AP)—Gripped by the coldest weather this winter, the Rocky Mountain region faced a prediction of another 24-hour siege of sub-zero temperatures.

Temperatures over the territory ranged from only a few degrees above zero to 25 below.

Snow fell intermittently in various sections and extended eastward into Kansas, Oklahoma and north Texas, where the severest cold of the winter prevailed.

Highways in the higher altitudes in the mountains were blocked by huge drifts and travel was suspended in many sections. Eleven marooned motorists were rescued after being snowed out near Durango, in southeastern Colorado. A rescue party on snow shoes set out to determine if any others were in need of help. There had been reports of a family of three lost in the region.

Casper, Wyo., with 28 below, Great Falls, Mont., was 26 below and Sheridan, Wyo., with 24 below were the coldest points reported today. In Denver the temperature ranged from four below this morning to one above this afternoon.

Gurdon Pastor Is Moderator of Presbytery

GUARDON, Jan. 16.—Ouachita Presbytery met in called session in Malvern yesterday in the Presbyterian church to dissolve the relation between the Hot Springs church and Dr. Stuart R. Oglesby, and also to dismiss him to Atlanta Presbytery.

Dr. Oglesby goes to Atlanta, Georgia, to take charge of the Central Presbyterian church of that city. M. D. Williams was elected moderator and Dr. Hugh Robertson clerk of the Presbytery.

The Star's Platform

CITY

Apply the revenues of the municipal power plant to develop the industrial and social resources of Hope.
Move city pavement in 1930, and improved sanitary conditions in the alleys and business back-yards.
Support the Chamber of Commerce.

COUNTY

A county highway program providing for the construction of a minimum amount of all-weather road each year, to gradually reduce the dirt road mileage.
Political and economic support for every scientific agricultural program which offers practical benefits to Hempstead county's greatest industry.

Encourage farmer organizations, believing that co-operative effort is as practical in the country as it is in town.

STATE

Continued progress on the state highway program.
Fearless tax reform, and a more efficient government through the budget system of expenditures.
Free Arkansas from the cattle tick.

A Tragic Lesson

A DREADFUL example was given those people who attempt to put themselves above the rules and regulation of a civilized community, when an epidemic of smallpox swept through Texarkana last week.

Newspapers used the term "epidemic" very cautiously, but in the case of Texarkana it seems to have been justified. Press dispatches out of the border city reported a great number of cases of smallpox at the height of the outbreak.

Health authorities told the newspapers that the outbreak reached epidemic proportions only on the Texas side of the city, "because compulsory vaccination is not practiced on the Texas side as strictly as on the Arkansas side."

Nowadays smallpox is the most inexcusable of all diseases. The discovery of vaccination two centuries ago banished it from civilized communities. The only cities that have ever been visited by this medieval terror since then, have been cities that were either criminally negligent, or whose headstrong citizens thought they knew more than the doctors did.

You may still hear the merits of vaccination debated by otherwise intelligent men. But write it down in the book: They don't know what they are talking about. Men lose money. They forfeit position. They destroy health and peace of mind—still firmly convinced that they always were, and always will be, right.

The individual is entitled to his own freedom of action, but only so long as he doesn't imperil the rest of the community. After Texarkana's tragic lesson of last week it is obvious that the person who has any opinion to express about the merits of compulsory vaccination ought to move out on a desert island. He is too wise—or quarrelsome—to be a safe neighbor.

It's Up To The Police

THE American policeman gets blamed for a good many things—sometimes not. It seems a shame to lay anything more at his door; nevertheless, it is continually becoming more and more obvious that the proper operation of the prohibition law is, in the last analysis up to the cop on the beat.

We can argue about prohibition all we please; but we shall not have tight enforcement until we can persuade the corner cop—no matter how that the dry law is a law that deserves enforcement just as much as the law against homicide.

Here is an example of what we're talking about:

In a large middle-western city there was recently a strike of some 5000 garment workers. Fearing violent outbreaks, the city authorities put a heavy detail of police on duty throughout the strike district.

Now it happened that there was a speakeasy right in the center of this neighborhood. During the strike, there were upwards of a score of patrolmen on duty in the immediate vicinity of this speakeasy. So, after a couple of days the liquor-seller closed his doors.

That sounds all right. But it didn't happen the way you might suppose.

The proprietor wasn't afraid of being raided. But the police got into the habit of dropping in on him every half hour or so to get a little drink, the weather being very raw and chilly. Naturally, he couldn't think of charging them anything for their drinks. And there were so many of them, and they drank so frequently, that they drank up all of his profits.

So he had to close his doors until after the strike.

That little story tells a good deal.

Obviously, in that particular city the average patrolman didn't class the prohibition law with the rest of the laws he was sworn to enforce. He simply ignored it—unless specifically ordered to enforce it. As a result that city has poor enforcement.

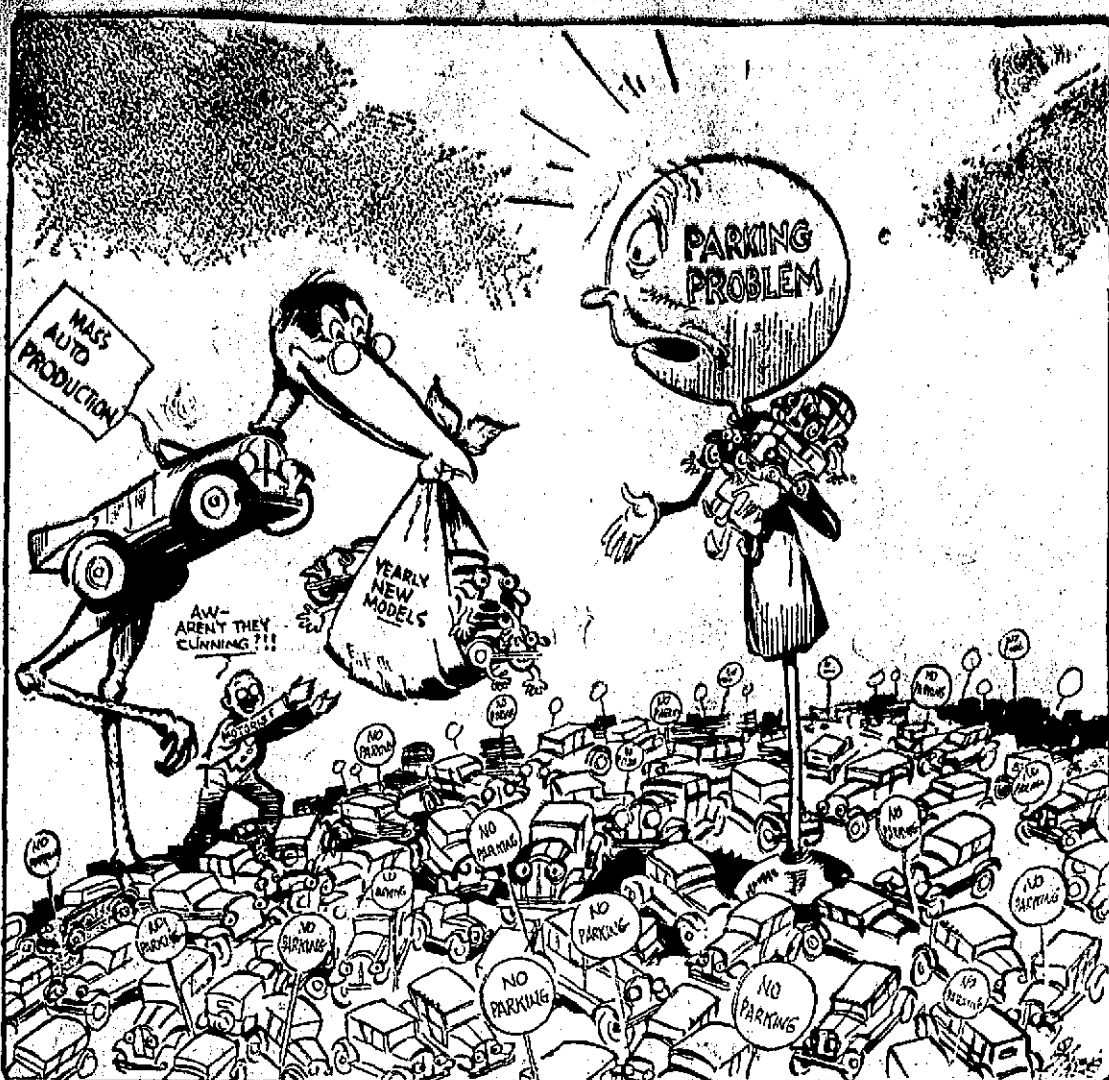

If you want good enforcement, you must persuade the police.

City Finances Again

MORRILTON isn't the only town in Arkansas that is having difficulty living within its income. The Stuttgart City Council is face to face with the situation that the city government must have additional revenue immediately, and are considering the adoption of an occupation tax. Such a tax has proven the solution of the financial situation for scores of towns in Arkansas and will open the way for Morrilton to get its city government on a sound financial basis.

If adopted, economical handling of the city finances coupled with a contemplated reduction of \$2,500 a year in the sum paid the Arkansas Power and Light Company for street lights and fire hydrants, would permit outstanding city scrip to be retired, and the tax abolished after two or three years. —Morrilton Democrat.

You Made Me What I Am Today!

Daily WASHINGTON LETTER

By RODNEY DUTCHER

WASHINGTON — Prayers, please, for the president. The louder and longer the better.

For any ordinary citizen who believes he has important troubles of his own, nothing can be more cheering or encouraging than the consideration of the many difficulties which confront Mr. Hoover. He is, to be sure, certain of his job and of enough to eat, which is more than can be said for many ordinary citizens, but the number and weight of the problems worrying Mr. Hoover are probably equaled by those of few men in the civilized world.

The fact that he is thin-skinned, the fact that he instinctively prefers action to inertia and the further complicating fact that he loves to administer but hates to fight do not make the prospect a bit rosier.

All Kinds of Problems

There is possible trouble on all fronts and certain trouble on most of them. Problems political and economic and international. All to be faced without even a working administration majority in the Senate. And with ever so many persons in Washington who would be delighted to see Hoover make a few flops.

The president for all his ability is not popular here. No president ever is, for that matter, but this one has managed to meet more actual bitterness against him than Coolidge and Harding were able to stir up together. Of course, much of this bitterness, considering its sources and motivations, is complimentary. But seldom helpful.

Hoover starts the year dealing with the most irritating and fundamentally most difficult problem, prohibition. He probably can get through

1930 on that issue by swimming with the tide, giving the dregs what they want. It may involve jerking in his Committee on Law Enforcement and Observation as an emergency political instrument and ruining it as regards realization of its original lofty purposes, but the president has always rebelled at the thought of risking the success of his administration on such a hybrid issue as prohibition. Still, solution is not in sight.

None of the problems which worried him last year will be any less pressing. He still can't be sure what the tariff bill will look like when it reaches him. It is very likely to contain the pesky part taking away the existing presidential flexibility power, one of the two things he has vigorously opposed in the tariff fight, which would mean that he must sign it while holding his nose, or veto the bill, to the great rage of both industry and agriculture.

Doubt has been growing concerning the possibility of reducing the navy as the result of the London conference this month, despite Hoover's reduction, and ever Ahlsvy city... ver's early announced anticipation or reduction, and ever so many people will tell you that the conference is going to be Hoover's first major flop. At best it appears that instead of reducing the navy we will have to build the other 10 of our 45-cruiser program which haven't been begun while postponing replacements of capital ships. At worst there ought to be a closer rapprochement between the MacDonald and Hoover governments, but whether Hoover can come out of the conference amid the cheers of his countrymen is a question which probably is bothering him considerably.

all about that new remedy for bunions.

There were 1,500,000 people over 10 years old in this country in 1920 who could not speak English. Probably the influence of the sports pages.

For the 10 years ending with 1926 we passed 230,000 more laws than were already on the statute books. And one of those has been broken quite frequently, we understand.

Crime hates the camera and the reporter, says a magazine writer. For that matter, so does Gene Tunney.

That recent \$500,000,000 steel merger reminds us—has Babe Ruth signed up yet for 1930?

Men make love to blonds, says a color specialist, and marry brunets. Statistics also probably show that brunets can shoot straighter than blonds.

We spend \$100,000 each year to guard the mails, according to government reports. But even that doesn't prevent your receiving letters telling you

Marion Talley, retired grand opera prima donna, was too busy practicing singing, when a little girl, to attend parties or have "boy friends." At 22, she never has had a sweetheart and lives on a Kansas farm.

TWENTY-FIVE YEARS AGO

B. G. Cox, of Fulton, was registered at the Hotel Barlow last Monday. Senator T. C. Jobe came down from Little Rock and spent Sunday at home.

Miss Gus Bell, of Nashville was a visitor in Hope during the past week. Joe Winter, a merchant at Nashville was a visitor in this city Saturday. Mrs. T. J. King entertained sixteen of her lady friends at lunch Tuesday afternoon.

TEN YEARS AGO

O. S. Jones, of Prescott was a visitor in this city today. Chas. H. Goodlett was a visitor in Hope today.

Erle C. Turner of Patmos, was a visitor in this city last night and a guest at the Capital Hotel.

J. C. Stephenson, of Nashville, was a visitor in the city yesterday.

Mr. and Mrs. John Collins of the New Grand theatre, are in Texarkana today.

Mr. and Mrs. Frank E. Howson are visiting in Texarkana today. Rev. and Mrs. R. B. Mitchell, of Edinburgh, a. arrived in Hope today where they will make their future home. Mr. Mitchell has accepted the pastorate of the First Christian church in this city. They will receive a cordial welcome from the people in this city.

Vision Limited by 'Rough' Light

Investigation of Atoms Disturbed by Velocity of Moving Light Beam.

ITHACA, N. Y., Jan. 15.—(P)—Even though microscopes become powerful enough to magnify atoms to visible size, there is a remarkable limit beyond which man now seems unlikely to pass in peering into the secrets of nature.

This barrier is made by light itself and is explained by Prof. G. P. Thompson, English physicist of international reputation, who is George F. Baker non-resident lecturer in chemistry at Cornell University, this semester. He is professor of natural philosophy at the University of Aberdeen.

"A most interesting thing," he says,

Bars Television From Radio Wave

Radio Commission Not Convinced That Sets Be Ready for Public

WASHINGTON, Jan. 15.—(P)—Radio "lookers" who expect to receive in 1930 pictures or images in the broadcast program hours apparently are doomed to disappointment.

Engineers of the federal radio commission believe television and picture broadcasting have not yet reached a stage of public entertainment value to warrant their transmission on the wavelengths now used for sound.

The commission a year ago announced that radio vision would not be permitted in the broadcast band from 200 to 550 meters except between 1 a. m. and 6 a. m. for experimental purposes. Commission engineers say that while progress has been made the last year in improving television, even the best transmission are comparatively crude.

A year ago it was the consensus of engineering opinion that a channel 100 kilocycles wide was necessary for good television results. In the meantime several experimenters have reported successful transmission on 10 kilocycles.

The radio commission, however, is not convinced that television in the broadcast band will not seriously interfere with the reception of other programs.

SPRING HILL NEWS

We are still on the map, but way down here surrounded by mud holes, why can't we have gravel roads too? We are paying taxes, and willing to do our part.

F. J. Hill is doing nicely after his operation. He is home enjoying good fireproof comfort. Mr. Fred Yocom and Spofford Sooter were in the cattle business

"Is the fundamental reason why we cannot expect to see inside an atom, or at least why we cannot see certain things therein. It is becoming apparent that there is a limitation to our atom probe, which is a beam of light. A ray of light is thought of as a delicate thing, one which ordinarily does not hurt when it strikes."

"But when light reaches so small an object as an atom it no longer is so delicate. It gives an atom a hard poke. In X-rays we have an even more penetrating probe, because the rays are much shorter than light rays, but the X-ray deals the atom a still more severe blow."

"And so, if the eye by the aid of instruments, could look at an atom, you would see a sort of blur, for you would be examining a disturbed atom, one in motion imparted to its party by the light, and atom not normal. The electrons, of which we conceive atoms to be composed, would be knocked about."

LIFE IS LIKE THIS!

Victor Herbert's Former Assistant Now An Elevator Operator in Los Angeles, but Plans Comeback

LOS ANGELES, Jan. 15.—Anthony Dorn is still having his ups and downs.

For Dorn, one of the outstanding figures in the musical world 20 years ago, is now an elevator operator in the city hall here. He came to Los Angeles, tried to crack the motion picture, failed, and as he puts it, "ran out of cash."

So he took his present job and is planning to struggle back to the heights he once occupied.

Years ago Dorn directed a number of musical shows for the Shuberts and was at one time assistant to Victor Herbert.

Before that, he studied in the United States and in Europe under some of the most noted musicians of the day. He is a graduate of the Vienna Conservatory.

Leaving New York, Dorn came to Hollywood, where he did some manuscript work on pictures, including the "Covered Wagon" and the "Big Parade."

But he was a little too soon; it was before the advent of the all-singing, all-musical pictures. Without money, he was forced to take a job as an elevator operator.

"My heart is still with music," he says, "and it is only a question of

Anthony Dorn . . . he's having his ups and downs.

time until I shall be able to get into the work that I love."

Dorn has been working at the city hall for about 14 months. His pay was brought to light only recently when he applied to the city council for funds to organize an orchestra among municipal employees.

seriously ill for some time, is no better. Mr. Jim Foster and Finley Turner were Wednesday visitors to Hope.

A THREE DAYS' COUGH IS YOUR DANGER SIGNAL

Coughs from colds may lead to serious trouble. You can stop them now with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a medical discovery with two-fold action; it soothes and heals the inflamed membranes and inhibits germ growth. Of all known drugs creosote is recognized by high medical authorities as one of the greatest healing agencies for coughs from colds and bronchial irritations. Creomulsion contains, in addition to creosote, other healing

CREOMULSION FOR THE COUGH FROM COLDS THAT HANG ON

--to this "Caterpillar" school

FORTY-FOUR years of field and factory experience has been crystallized into a short course of instruction and made available to the people of this community through the annual "Caterpillar" School which will be held in the service rooms of the Ark. Tractor & Equipment Co.

Moving pictures—short, crisp lectures and actual demonstrations will be employed to tell you and show you how tractors and tractor operated machines are used—how they are operated, serviced and repaired.

Power and its application to farming, road-building, and industry will be treated thoroughly but concisely by specialists in each branch of work.

If you own power equipment, if you are an operator, or are merely interested, you are welcome. Come as our guest.

Phone for a reservation so that we may care for you during the instruction sessions and entertainment periods.

A FRENCH necklace to enliven the bathing costume is an important accessory to take south. This one has clusters of red flowers with black links.

Mrs. T. S. McDonald was hostess yesterday afternoon to the members of the Fortnightly Club and a number of invited guests, at her home on South Pine street. The rooms were arranged for three tables, with Mrs. Dewey Hendrix scoring high for the guests. After a series of pleasant games, the hostess served a delicious salad course with tea.

The Friday Music Club will meet tomorrow afternoon at the home of Mrs. Geo. Green, on North Louisiana street. The Choral Club will meet promptly at 2 o'clock, and the study club at 3 o'clock with Mrs. W. P. Cline directing the club study.

Mrs. Fred Marshall of Texarkana is in the city today directing her vocal class at the home of Miss Maggie Bell on South Main street.

Mr. and Mrs. Sid Henry entertained at dinner last evening at their home on South Main street for the pleasure of Mr. and Mrs. Charles Newham, who are leaving soon for their new home in Little Rock. Covers were laid for Mr. and Mrs. Newham, Mr. and Mrs. James L. Jamison, Misses Mae and

Nation Celebrates Prohi Anniversary

1930 Will Be Critical Year In "Great Experiment" Is Thought.

By L. A. BROPHY

(AP) Feature Service Writer

WASHINGTON, Jan. 15.—(AP)—Ten years ago today the practice of resting a crooked arm on a polished bar became an unconstitutional gesture.

The eighteenth amendment went into effect at midnight, January 16, 1920, after Nebraska had ratified it as the thirty-sixth state. Adding prohibition to the basic law, however, made little difference then, as the country had been under a wartime ban on liquor since the preceding July.

Prohibition, stretching its limbs as a 10-year-old, finds itself being cuffed about strenuously, but with enforcement, rather than drinking, the target for controversy.

Many profess to see that 1930 will be as critical a year for the "great experiment" as any in its existence.

Outstanding in developments that followed rapidly as 1929 waned were:

The charge, taken directly to the White House by Senator Borah of Idaho, that governmental enforcement personnel is not efficient.

The sweeping study of dry law application by President Hoover's commission on law enforcement.

Certainty that prohibition will be a major legislative topic before congress this year.

A possible supreme court ruling on the move to make a liquor purchaser equally guilty with the seller.

Statement of Rear Adm. Frederick C. Billard, commandant of the coast guard, that "ambitious gestures" will not be used in seeking to prevent liquor smuggling.

Organized forces, for and against prohibition, marshalled their resources for continued battle.

On its tenth anniversary, Henry H. Curran, president of the Association Against the Prohibition Amendment, in a statement said that national prohibition reminded him of a "squirrel in a revolving cage."

"The little fellow makes a great show of doing something," he said. "He runs at a furious pace until he is worn out, subsides long enough to catch his breath and then starts off again."

And the ordinary observer, outside the cage, finds himself reflecting that not all motion is progress."

On the other side, Dr. F. Scott McBride, general superintendent of the Anti-Saloon League of America, said "increasing sentiment for national sobriety marks the first decade of constitutional prohibition."

"This sentiment has been shown in repeated elections," he added. "A changing social attitude is being manifested. To the economic progress of the United States prohibition has undeniably contributed."

WARNING ORDER
IN HEMPSTEAD CHANCERY COURT

SARAH McEACHRAN, ASSIGNEE, PLAINTIFF, V.
ROLAND, ELLIOTT, ET AL., DEFENDANTS.

The defendant, The American Investment Company, a corporation, is warned to appear in the Hempstead County Chancery Court within thirty days and answer the complaint of the plaintiff, Sarah McEachran, Assignee.

WITNESS my hand as clerk of said court and the seal thereof, on this 18th day of December, 1929.

WILLIE HARRIS,
Clerk of the Hempstead County Chancery Court.

The Alathean class of the First Baptist Sunday school, held its regular monthly business and social meeting on Tuesday evening, January 14, at the home of Mrs. Fred White on South Main St., with Mesdames D. B. Russell, John S. Gibson, Jr. and C. C. Collins, joint hostesses. There were 28 present. A short business session was held with the president, Mrs. J. W. O'Neal, presiding, followed by reports from the officers. Six tables were arranged for hearts. Mrs. McKinney scored high. A most tempting salad plate was served by the hostesses.

Hunt "Parrot Fever" Germ

Ohio parrot importers are assisting in tracing the bird which is said to have caused three cases of the dread "parrot disease" at Warren, O. Here you see Louis Haller, Cincinnati bird importer, left, checking over recent parrot arrivals from foreign ports with his secretary, Walter Brandt. Their record book contains lists of importations, purchases and sales.

Santa Leaves More Gifts In Mountain Burg Than Any Other Place, According to Population

GLACIER PARK, Mont. Jan. 15.—This burg, boasting a population of 289 regular inhabitants, is credited by postal officials with having received more Christmas packages than Santa Claus directed to any other town of its size in the United States. A single delivery of mail off the Great Northern "White Flyer" (the fast transcontinental mail train from Chicago to the Pacific Northwest) filled the town's post office sorting room (12x18 ft.) right up to the ceiling; barely leaving room for two workers to move about.

Why this bountiful outpouring of Christmas spirit in the form of an avalanche of bundled gifts laid down here in the wilds at the base of the Rocky Mountains? Mike Shannon, veteran guide, explains it simply enough. He says:

"Everybody here is connected with the 'dude' business in some way, as guides, storekeepers, bus drivers, dance hall managers, hotel keepers or dude ranchers. Every season a goodly number among the 50,000 or more tourists who visit the Park become close friends with some of the 'natives.'"

"Packages and post cards received include many famous names, such as

Rothschilds, Rockefeller, Childs of the banking chain, Mrs. J. E. Hagen, Mary Roberts Rinehart, George Bird Grinnell, Mrs. Charles Russell, James Willard Schultz, Mrs. Joseph Lindon Smith and many others.

"The 'dude wrangler' has to be of a social nature and the long, lonely winter months give him rest from requirements of ability of the short summer season.

"The tourist accustomed to conventionalities and restrictions of the city enjoys the free and easy customs and manners of outdoor life when he comes out here. He feels that he is actually taking a share in many things that he has only read about when the talk drifts to how horses wintered on the Hudson Bay ridges; what section of the Big river country is the best for bear hunting, or what mountain passes have been opened in the spring.

"When their summer's enjoyment has been watching and living the life of a cowboy, or motoring through scenic beauties of the country, they retain warm memories of any one who has contributed to that enjoyment, and show liberal appreciation at Christmas time—and we sure do appreciate the presents."

Youthful Lovers Made Victims of Unkind Fate

One of the minor executives in a large New York office and one of the secretaries had been carrying on a secret romance for some time, although no one in the establishment was aware of it.

Being an up-to-date young man, the executive, who shall be known only by his first name, Philip, to save embarrassment, carried on his courtship in a modern manner. Instead of writing her letters in the preliminary stage of his campaign he conceived the idea of waiting until the rest of the office had gone home and then speaking a few words into the dictaphone she used.

The next morning she would put on the ear phones and hear something along this line: "This is Philip, sweetheart. Don't forget I love you."

But one day the secretary was ill and could not report to work. The result was that her substitute, starting to transcribe the letters on the cylinder, heard the love message and

burst into laughter. Philip was unable to stand up under the rizzing he received daily thereafter and soon found another position.—New York Sun.

Goitre Not A Disease

Milwaukee Doctor Makes Remarkable Discovery

Milwaukee, Wis.—It has been brought to light by scientific research that goitre is not a disease and is not to be treated as such. Dr. A. A. Rock, Dept. F12, Box 737, Milwaukee, Wis., a prominent goitre specialist for over 24 years, has perfected a different method of treatment for his patients that has proved remarkably successful. This same method is now being used for a home treatment of goitre cases all over the country with astonishing results. The doctor states that goitre is a condition which grows worse with neglect and recommends immediate attention no matter how small the growth may appear. He strongly opposes needless operations. Dr. Rock is the author of a book that tells in a simple way about treating goitres at home. He has published this book at his own expense and will send a copy free to anyone interested. Write him today.

Bobcats Lose In Game Last Night

"Washington Senators" Victories In Games With Guernsey.

In a practice game at the army ...

The "Washington Senators" were winners in a double header, the junior team defeating the Guernsey "Boo Boos" by a score of 8 to 4. The senior team ran rough shod over the Guernsey "Wow Wow" five by a large score.

There will be games played at the local armory every Wednesday and Friday nights by different teams over this era. Tomorrow night the strong Texarkana five will clash with the Hop Hi Bobcats in their initial tilt of the year.

The Columbus cagers will take on the Rocky Mount five. Games are called at 7:15 p. m., except the battle with Texarkana when one game will be played at 4 o'clock in the afternoon, and the second is slated for 7:15.

great work of twentieth century physics.

The other two steps in the development of the so-called wave theory were made by Professor Compton and by Davison and Germer of the Bell Telephone company laboratories at New York. The theory itself was outlined by De Broglie, famous French physicist.

Dr. Dempster was born in Toronto in 1886 and was graduated from the university of Toronto. He studied in Germany from 1911 to 1914, took his doctor's degree at Chicago in 1916, served two years in the signal corps of the army during the war and has been at Chicago ever since.

The three discoveries, of which Dr.

Patmos High School Wins Over Centerpoint

The "Patmos Hornets" of Patmos high school met Center Point on Saturday night, January 11 in a basketball game at the gym at Hope. It was a hard fought game. Both teams were fighting it. The regular game was played in which the scores were "The Hornets" 14, and Center Point 14.

A rest of one minute was given. Then played 5 minutes in which the scores were 16 to 16. Another short rest was given, and then the struggle began again. Four points were made by one of the "Hornets" H. Duke, in which Center Point went down in defeat. The score being 20 to 16.

Bootlegger Gets Ride To Jail In Hearse

STUTTGART, Jan. 16.—Mack Journey erstwhile bootlegger, who was fined \$107.50 in municipal court here Monday on a charge of transporting liquor, was taken on a truly hair-raising "journey" Saturday night.

Journey was caught red-handed and red-nosed by Night Policeman P. J. Cato at the Cotton Belt station with a flash of whisky on his hip. He was drunk and Cato had no method of conveying him to the police station.

Finally, however, Cato hit upon the novel idea of telephoning the Turpin Undertaking Parlor, and in a jiffy the brakes of a hearse squeaked outside the depot. Journey was lifted in bodily and taken to jail, where he was lodged for the night.

Journey is a resident of the Bayou Meto community, in the southern part of the county.

Dempster's is the last, are probably the most striking advance in physics in 20 years, according to Dr. Henry Gordon Gale, head of the department at Chicago university and president of the American Physical society.

Emmett Hi Cagers Give Tigers Battle

Fast High School Quintet Shows Three Classy Players.

The Emmet high school basketball team, one of the best prep cake fives in this part of the state gave the Ouachita College Tigers a stiff tussle in the college gym at Arkadelphia Tuesday night, losing by the score of 55 to 42. Garrett, center, and Wiley, forward, and N. Purdie, guard displayed a brand of play that stamps them in the star class and assures for Emmet many victories this season, in the opinion of Assistant Coach Hill Brasher of Ouachita. Dick Nance of the college team scored 17 points and Ted Jones 16, Ed Hopkins also played well.

This was another one of those practice games, in which a large number of Ouachita men were used. Ellis and Rankin showed to advantage as well as Ed Hopkins, all of the reserve squad, and it is likely that they will see much action with the varsity this season. Coach Hammons, a Rotarian was in Hot Springs with the club while Assistant Coach Brasher directed affairs. Curtis Pulling refereed the game.

Relief from Gas Stomach Pains Dizziness

The doctors tell us that 90 per cent of all sickness is due to stomach and bowel troubles. You can't be well if your digestion is bad; you are likely to get sick unless you relish food and digest it properly.

Tanlac has a wonderful record as a relief from digestive troubles, even those of years standing.

Local people, many of whom you know, are highly endorsing Tanlac. For example, Mrs. Ellen White says: "For years I suffered from indigestion. I got no relief from anything until I took Tanlac. After my fourth bottle, I feel like a new person and have a fine appetite."

If you suffer from gas, pains in the stomach or bowels, dizziness, nausea, constipation, or torpid liver; if you have no appetite, can't sleep and are nervous and all run down, you need Tanlac. It is good, pure medicine, made of roots, herbs and barks. Get a bottle from your druggist today. Money back if it doesn't help you. Accept no substitute.

REDDIES CLASH WITH OUACHITA SATURDAY

Game Will Be The Opening of Basketball Season for Both.

ARKADELPHIA, Jan. 16.—Coach Rowland's basketball squad of approximately 25 men at Henderson State Teachers College is showing steady improvement in its daily practice.

"Accident" Again Aids New Science

Chicagoan Discovers Basis for Proving That All Matter Is Alike.

CHICAGO, Jan. 15.—(AP)—An "accident" has again produced one of the great scientific discoveries of recent years.

Dr. A. J. Dempster, university of Chicago physicist, who discovery of wave motion in protons, or positive particles of hydrogen, has been hailed by prominent physicists as the most important in years, was led to his achievement by a "leaky" magnetic field which was designed to keep out of the picture the very particles in

which the wave motion was found.

Experimenting with negative particles, Dr. Dempster had set up a magnetic field for the purpose of attracting out of the way the positive particles. Some of these "leaky" through, however, and the discovery was made possible.

The achievement won for him the \$1,000 prize offered by the American Association for the Advancement of Science, awarded for the most outstanding paper contributed to the meet of the association.

It opens the way for proof of the hypothesis that all matter is substantially the same, and that the 92 elements are merely matter under different conditions of motion.

"It is a scientific simplification which makes the matter all the more complicated," Dr. Dempster said. "Reducing the elements to a common basis of matter seems to be simplification, but the possibilities and ramifications of the differentiation by motion really make it all the more complicated."

Dr. Dempster's discovery was made by deflecting hydrogen atoms off a crystal, in a vacuum, upon a photographic plate, at a speed which was 1,000,000 times that of ordinary light. He found that the picture on the plate was a fan-shaped design instead of a simple dot, as it would have been had the positive particles possessed no motion, which was heretofore believed.

"This," said Prof. Arthur H. Compton, also a noted physicist of the University of Chicago and a Nobel prize winner, "is the completion of the

which the wave motion was found.

Experimenting with negative particles, Dr. Dempster had set up a magnetic field for the purpose of attracting out of the way the positive particles. Some of these "leaky" through, however, and the discovery was made possible.

The achievement won for him the \$1,000 prize offered by the American Association for the Advancement of Science, awarded for the most outstanding paper contributed to the meet of the association.

It opens the way for proof of the hypothesis that all matter is substantially the same, and that the 92 elements are merely matter under different conditions of motion.

"It is a scientific simplification which makes the matter all the more complicated," Dr. Dempster said. "Reducing the elements to a common basis of matter seems to be simplification, but the possibilities and ramifications of the differentiation by motion really make it all the more complicated."

"Story Book Romance" Crashes

The "story book romance" of Rosamund Gluck Powell, shown above, and Ralph Powell, inset, has come to an end in the Omaha divorce courts. Powell gave up a \$150-a-week position as secretary to Mrs. Arthur Schoellkopf, widow of the Niagara (N. Y.) Power Company executive, who inherited \$55,000,000 upon her husband's death, to marry Miss Gluck, who is Mrs. Schoellkopf's niece. The couple disregarded Mrs. Schoellkopf's disapproval of their marriage and Powell took a job as real estate salesman in Omaha at \$150 a month. Now he has fled suit for divorce and asks custody of Ralph Jr., their 4-year-old son. Powell was three times Missouri Valley Tennis champion.

Are Your Plants HUNGRY?

Do your plants go begging for food when you could give them a square meal of the plant foods that they require? Why should they waste their energy in fighting for an existence when you could easily supply these food elements which the soil is lacking?

Feed your plants WHITE DIAMOND, and in addition to a better crop you will also be building up the soil for next year's plantings! Meanwhile, PROFITS this year!

"A Greater Yield For Every Field"

This Fertilizer is made by the largest plant in this territory, making Fertilizer exclusively for 28 years. Each sack will stand chemical tests for the analysis specified, and there is an analysis for every soil, every crop and every purpose. Call for this analysis by specific name, packed under the WHITE DIAMOND Brand. (Send for list.) You may have fullest confidence and complete protection. Packed in clean new bags, only when shipped—it comes to you fresh—full of life and energy for your plants.

POLITICAL ANNOUNCEMENTS

City Election February 25, 1930.

For Mayor
The Star is authorized to announce the candidacy of Claude Stuart for Mayor of Hope, subject to the action of the Democratic city primary February 25.

The Star is authorized to announce the candidacy of A. L. Betts for Mayor of Hope, subject to the action of the Democratic city primary February 25.

The Star is authorized to announce the candidacy of Ruff Boyett for Mayor of Hope, subject to the action of the Democratic city primary February 25.

For Marshal
The Star is authorized to announce the candidacy of M. D. (Miles) Downs for Marshal of Hope, subject to the action of the Democratic city primary February 25.

The Star is authorized to announce the candidacy of Clarence E. Baker for City Marshal of Hope, subject to the action of the Democratic city primary February 25.

For City Recorder
The Star is authorized to announce the candidacy of Fred Webb for recorder of Hope, subject to the action of the Democratic city primary February 25.

For Alderman
The Star is authorized to announce the candidacy of C. F. Erwin for alderman in Ward Two, subject to the action of the Democratic city primary February 25.

For City Treasurer
The Star is authorized to announce the candidacy of J. W. Harper for re-election of City Treasurer, subject to the action of the Democratic city primary February 25.

FOR COUNTY OFFICE
County Election, August 12, 1930.

For Sheriff
The Star is authorized to announce the name of J. E. Bearden as a candidate for the office of Sheriff, subject to action of voters of Hempstead county at the August primary election.

The Star is authorized to announce the candidacy of J. W. Griffin for sheriff, subject to the action of the Democratic county primary August 12.

For County Judge
The Star is authorized to announce the candidacy of H. M. Stephens for county judge of Hempstead county, subject to the action of the Democratic county primary August 12.

For Tax Assessor
The Star is authorized to announce the candidacy of John W. Ridgill for Tax Assessor, subject to the action of the voters of Hempstead county at the August primary election.

OUT OUR WAY

1929 Weather Record Unusual for England

LONDON, Jan. 15.—(AP)—The English climate never has been celebrated for its consistency, but its vagaries in 1929 exceeded all previous records.

The year's first freak was the heat wave that occurred at the end of the coldest January recorded for 34 years. As the mercury leaped suddenly upward to a reading of 63 degrees in Wales. In February came the great frost. The 12th of the month was the coldest February day for 86 years.

March was one of the driest months ever recorded. Several places in the London district got no rain at all during the 31 days. A remarkable rise in temperature took place and from the 28th to the 30th the March records of all time were beaten. April and May were exceptionally cold. June and early July also were cold.

Chicago Optometrist Offers \$20 Spectacles For \$2.98.

GIVES 100 DAY TRIAL
A Chicago Optometrist has devised a new comfort spectacle that leaves no mark on the nose or face, is guaranteed against breaking or tarnishing. These spectacles are really beautiful, create a distinguished appearance and will enable anyone to read the finest print, see far or near. The manufacturers now offer to send a pair on 100 day trial to any honest person with the understanding that if their customers are not amazed and delighted and do not think the spectacles they list at \$2.98 equal to those sold elsewhere at \$20, they will be out nothing. A beautiful spectacle case and style book included free. Send no money, just your name, address and age if you wish to try a pair of spectacles at the risk. DRY CHIEF'S WIFE CONCOCTS FAMOUS KICKLESS COCKTAIL

WASHINGTON, Jan. 13.—The wife of the nation's chief prohibition enforcement officer is mixing the most famous cocktails in Washington these days.

Furthermore, she serves 'em to members of the W. C. T. U., and the capital's most ardent dries are besieging her for her receipts.

They're non-alcoholic, of course. "Prohibition took something away from the American people, but we can give them something just as good—a cocktail that satisfies but does not inebriate," says Mrs. James M. Doran, wife of the United States Prohibition Director.

Such old favorites as mint juleps and lime fizzes—with certain "old-fashioned" ingredients necessarily missing—appear in Mrs. Doran's "Book of Juices" which she has prepared to meet the onslaught of the "winter social season just ahead."

Here are some of her favorite recipes:

"Take a pound of seedless grapes, chopped very fine, and a quart of grape juice. Stir thoroughly and but on the 20th of the latter month the thermometer went to 90 degrees, a terrific thunderstorm swept southern England and a tidal wave alarmed the channel towns. The July storm, however, made no real impression on the drought, which had begun in the spring, and the shortage of water continued through August and September.

Then October produced an abnormally high rainfall. In November London received a year and a quarter's normal rainfall.

The December gales rose to a velocity of 108 miles an hour in the Scilly Islands on the seventh of the month, and in doing so broke every previous gale record for the British Isles.

Mrs. James M. Doran mixes one of her cocktails.

serve very cold.

"For a mint julep, take five lemons, a bunch of fresh mint, one and a half cups of sugar, one-half cup of water and three bottles of gingerale. Combine all ingredients but the gingerale, which should be poured in, over ice, after the mixture has stood half an hour.

"To make a lime fizz, first prepare a syrup by boiling together for five minutes one-half cupful each of water, orange, Cool and strain, add the orange, sugar and grated rind of one juice of four lemons and dilute with a pint of iced plain or charged water."

Rash Romance

© 1930 by NEA Service, Inc. by LAURA LOU BROOKMAN

BEGIN HERE TODAY

JUDITH CAMERON married ARTHUR KNIGHT, executive of a large business, in a city where which she is employed. They and for a six weeks honeymoon in Bermuda. Knight is a widower with an 18-year-old daughter, TONY, who is in Europe, and a son, JUNIOR, in at school. In his introduction he overtook the fact that Judith is not communicative about her past life. She does not tell him about her frequent meetings with a young man known as "DAN."

After the first week in Bermuda a cablegram arrives announcing that Tony Knight is coming home. Arthur tells Judith they must return at once to meet her. Since neither of the children knows of the father's remarriage, Judith is skeptical of her welcome. The fear proves well founded.

Arthur and Judith reach the Long Island home just one day before Tony's boat docks. Next morning Judith meets his daughter but when they arrive at the house Tony ignores Judith and rushes to her own room. Knight tries to reason with the girl and later assures Judith the difficulty will be soon settled. He goes to his office. Late that afternoon Tony confronts her alone and exclaims: "You're going to get out!"

NOW GO ON WITH THE STORY CHAPTER XIII

TONY KNIGHT, infuriated and in action, was a sight to make strong men quail. Her eyes flashed. The vivid, petulant lips were drawn with rage. Tony stamped one foot as she cried:

"You're going to get out of here—you gold digger! You cheap, scheming, money grabber, you! Don't think you can stay in this house and get away with your tricks! I won't have it. I—"

Judith was on her feet too now. Judith's eyes had narrowed. There was a dangerous light smoldering in her blue depths. No one had ever said that Judith Knight could not defend herself.

For a moment she hesitated, and in her perfect silence there was strength. Tony, spent with the tempestuous outcry, stood quivering and glaring at the older girl. Judith's lips moved—but before the words came she had checked herself.

She was remembering this was Arthur's daughter with whom she had to deal.

"I am not a gold digger," she said calmly. "I'm your father's wife and there is no reason why you should dislike me so. I want to be friends with you—"

The blazing Tony had recovered her voice again.

"But I won't be friends!" she screamed and her voice rose to a higher, louder pitch. "You're nobody! You're nothing but a sneaky, designing shop girl and you want my father's money. Well—you won't get it, do you hear that? You fooled him into marrying you, but he'll get rid of you all right. He'll do exactly as I say and I won't have you here! Do you get that?"

Someone else had come into the living room. Neither of the two girls had heard the third person's footsteps. Both turned at the sound of his voice.

"You are to apologize at once, Tony!"

Arthur Knight, coat over his arm and holding his hat, stood in the doorway. He had come into the house just in time to hear his daughter's last tirade. Knight's face was flushed and his chin (of which Tony's was an exact replica) was set in a hard line.

"Apologize to Judith!" he commanded his daughter the second time. "You are to do it at once."

"I won't!"

THE air of the room was electric. One spark—and the fuse would be lit. Judith glanced from her

"Apologize to Judith!" he commanded his daughter.

husband to Tony, then back again. What would happen next? It was terrifying.

"But you mustn't!" she protested. "You mustn't, Arthur—"

"Stay out of this, Judith," Knight told her curtly. "Tony is going to obey me. She is going to ask you to forgive the outrageous things she has been saying and tell you she is sorry for them. All right, Tony." He turned toward the girl. "Let me hear your apology."

Judith had never seen her husband in a mood like this. There was anger in his voice to match Tony's own. In addition there was determination to brook no resistance.

The decisive figure in this drama of clashing wills was Tony Knight. She met her father's gaze sullenly and rebelliously. Then, as though his unflinching disapproval was too much, she sank into a little heap on the davenport, hid her face in her hands and began to weep.

Ruddy circles of embarrassment shone in Judith's pale cheeks. What a scene for her introduction to the Knight household! And what gossip for the servants! Both the father's and daughter's voices must have carried far enough for them to hear. Judith had taken no part in the controversy and yet she knew she was the guilty cause of it all.

She looked at Arthur and thought his obdurate mood was weakening. Tony's shoulders rose and fell. Her quick, gasping sobs made the only sound in the room.

"Excuse me, ma'am!"

Frightened, apparently in doubt about the intrusion, Harriet appeared in the doorway.

"What is it, Harriet?"

"It's—someone on the telephone."

instantly as though something had happened. Suddenly Tony looked up at Judith.

"I apologize," she said in a grudging voice. "Since my father insists."

With that Tony Knight ran out of the room and by the stairway.

The restraint was broken and Judith made the most of it. She lit with a smile at the door quickly.

"Time is flying, Arthur," it was six o'clock and neither of them dressed for dinner. With a look like Cora in the kitchen it was never, never do to keep the waiting. Shant we go up?"

Knight picked up the hat and coat he had dropped into a chair. He looked tired.

"Yes," he agreed. "Hurry to get rid of these things."

Judith took the hat and coat from him. She hung them away in the closet for wraps. Then she closed the stairs.

Dinner had been ordered seven o'clock. Fifteen minutes before that time Judith was upstairs, nervously assuring herself that there could not be a scene. Such things did not happen. Two affairs like that in a row were impossible!

WOULD Tony appear for dinner? Arthur came down looking very handsome in his evening clothes. The hour had retreated and he seemed to have forgotten his anger.

"I sent off a note to Judith this afternoon," he told her. "By way, he'll be here Saturday. He decided what to buy the young gal for Christmas. You know, really please him it ought to be Graf Zeppelin. Think you can wrap it in an attractive package, Judith?"

She was glad to hear him say just then Judith's heart lifted. Down the stairs came Tony.

"Dinner is served, I think," Judith Knight. "Let's go into the dining room."

Tony spoke only once or twice throughout the meal but she turned toward her stepmother. She had dressed for the theater in a dazzling white frock which combined the crispness of tulle with the softness of silk. It was a great bow on the skirt, gashed its French origin, wore coral jewelry, no more daring than her lips.

The dinner passed more amiably than Judith had expected. Tony asked to be excused and her fee was served. She went up to her room, and 15 minutes later when Harriet announced a young man was waiting, Tony descended.

Judith saw that the girl was wrapped in white fur. Without a word for the two in the living room, Tony and her escort left the house.

An hour or so had passed before Judith Knight said hesitantly to Arthur:

"Do you know whom Tony is with tonight?"

He shrugged his shoulders.

"Good Lord, no! I can't keep track of her admirers. Never could!"

At that precise instant it happened Tony Knight rode in an imported coupe driven by a young man in evening clothes.

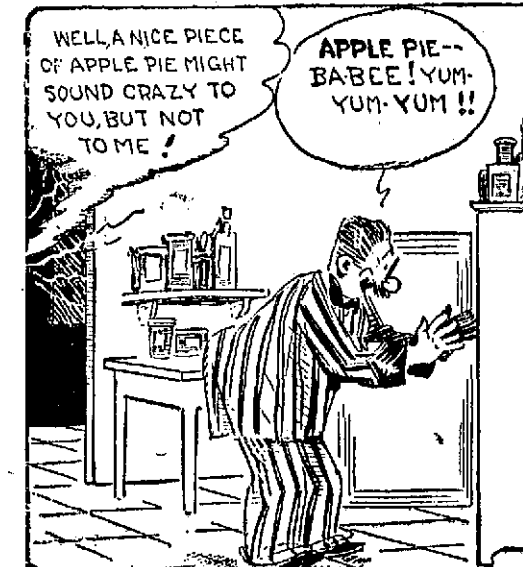

"No, no, darling!" he was saying to her. "Not the Casino! Much too likely there to meet my wife!"

Movie Industry Has Big Capital

\$4,000,000,000 Invested in Motion Pictures, Figures Reveal.

Jan. 16.—A total of \$4,000,000,000 is now invested through the world in the moving picture industry, according to statistics just compiled by the International Labor Bureau.

What is the number of employees engaged in the industry that the International Labor Organization has just made a world-wide survey of the industry as a basis for proposing future international labor conventions regulating the work of movie employees?

According to the statistics just compiled, the first movie exhibition was given in 1895.

Of the \$4,000,000,000 that have since been invested in the industry about 10 per cent belongs to the American owners, where the industry ranks first after foodstuffs and automobiles.

100,000,000 Weekly

The French investments in the industry total 2,000,000,000 francs; those of Great Britain 70,000,000 pounds; those of Japan 12,000,000 yen of 300; those of Germany 1,000,000 marks.

At the present time it is estimated that there is a total of 57,000 cinema theaters in the world of which 25,000 are in the United States. Germany has 5,000; England 4,000; France 4,000; Spain, Italy and Soviet Russia have 2,000 each; Sweden 1,300; Poland 1,000; and Belgium 1,000.

25,000 American houses with a total of 8,000,000 seats can accommodate 100,000,000 spectators a week.

The world production of films in 1929, which gave the latest statistics available, was 1,853 films. Of these the United States produced 473; Japan 407; Germany 278; Soviet Russia 151; England 106; France 74; China 57; Austria 10; and Denmark 10.

In the United States it has been calculated that the production even of a large studio is \$1,000 an hour. The average of six seconds of film when the latter is actually

MENUS FOR THE FAMILY

BY SISTER MARY
NRA Service Writer

MANY busy women find Sunday evening a most convenient time to entertain a few friends informally. The housekeeper without a maid or she who is a "business woman" as well as a housekeeper can manage a Sunday supper party when the more formal and elaborate dinner is out of the question.

One hot dish, some form of bread, relishes, dessert and something to drink is usually enough to serve. Bouillon or consommé may be the hot dish and a hearty salad may replace the relishes; but the menu should be kept simple.

If more persons are to be served than can be comfortably seated at the dining table, small tables can be placed in the living room and the food served buffet fashion from the dining room. The host serves the hot dish and the other dishes are arranged for each guest to help himself. The small tables can be completely "set up" or merely covered with lunch cloths. In this event the guests will bring their napkins and silver with them, cafeteria style, from the dining table. The dessert is brought in when wanted and served, individually.

Use Chafing Dish

A not dish made or at least kept hot in a chafing dish is always suitable and usually popular with both men and women.

Hot buttered rolls, split and toasted rolls, pop-overs or sandwiches made with unusual varieties of breads, are all good.

This is one festivity when the hostess may serve as elaborate a dessert as she pleases. A heavy meal has not preceded dessert, it's early in the evening and it's a grown-up party, so children need not be considered.

The following menu will suggest others to you:

Casserole of Rice and Mushrooms
Split and Toasted Rolls
Jellied Pineapple and White Grape Salad
Frozen Layer Cake
Salted Nuts Coffee

As regards employees, the United States naturally leads in the industry with 225,000 workers; 30,000 superiors and several thousands artists.

The largest German firm employs 4,000 workers; the French give employment to 1,000 workers, 1,000

Harvard Professor Sums Facts On Prohibition

Prof. Thomas Nelson Carver, a professor of political economy of Harvard University, writing in the Harvard Crimson, outlines seven facts about prohibition, which, he says, have not been sufficiently emphasized.

First, he says, it must be admitted there is a drink evil and uncurbed it is dangerous to civilization.

Second, every civilized country is engaged in a struggle to curb this evil.

Third, the fight against the liquor evil in this country began more than 150 years ago.

Fourth, in this conflict, the liquor interests have had the great advantage of being well financed. The drys must rely as in the past on the merits of their cause.

Fifth, very few wets will say they want the saloons back. If present conditions are, as they say, worse than when we had saloons, why not have the saloons back? They know well that present conditions, bad as they are, are vastly better than they were. To that extent at least prohibition is a success.

Sixth, the chief argument against prohibition is based on the word "can't".

Seventh, the wets are not willing to discuss the question, "Would prohibition be a good thing economically and morally for the country if it were well enforced?" That, after all, is the real question.

COMMISSIONER'S SALE

NOTICE IS HEREBY GIVEN, that in pursuance of the authority and directions contained in the decretal order of the Chancery Court of Hempstead County, Arkansas, made and entered on the 21st day of December, 1929, in a certain cause then pending therein between Mrs. T. E. Hollis, complainant, and Mrs. Mirtie Grif-

and very little national legislation of the working conditions such as has been done in the older and more stable lines of industry.

With the results of the worldwide investigation of the movie industry, which the International Labor Bureau has just completed it expects to take up later all the problems of working hours, health and safety of employees, employment of children and similar questions.

Ashdown Man Acquires Paper in Louisiana

HAYNESVILLE, La., Jan. 16.—R. M. Gilmore, editor and publisher of the Haynesville News for the last four years, today announced the sale of his paper to F. M. Graves, co-editor and owner with his brother of the Little River News at Ashdown, Ark. Mr. Graves will take charge today. The consideration was not disclosed.

The News is one of the best weeklies in northern Louisiana. It has a circulation of about 2,000.

600 School Children Affected By Flood

CLARENDON, Jan. 16.—Schools that are attended by 600 children in Monroe county will be forced to close when the crest of the White River overflow, predicted at 32 feet, January 24, reaches here according to County Superintendent W. E. Castleberry.

The river at Clarendon is about a foot under the nominal flood stage of 30 feet although it has widened to its limit westward and the enormous amount of water above here in the Cache and White rivers must flow between the bluff which forms the western boundary and the Clarendon levee. The White has reached a stage that sends backwater up the Cache and that will spread the headwater of the smaller river over a territory almost as great as in 1927 when its overflow was almost entirely from the backwater.

Millions of feet of logs along the banks of bayous, lakes, the old river and other places normally inaccessible to barges will be towed to the Clarendon mills or the river rail terminal by the Choctaw Transportation company.

Students in the University of Alabama are studying footprints left an estimated 40,000,000 years ago on a slab of rock found in the state. The animal is thought to be a forerunner of the dinosaur.

"Let's get up a Newspaper ad"

This is number ten of a series of ads depicting the various processes of advertising production. Number eleven will appear in an early issue. In ad No. 9 we placed our ad in its proper position in the page form.

"our Ad goes Home--"

THE fall opening announcement of the "Roseanne Dress Shoppe" has been printed and 2500 copies of it will be distributed throughout the Hope trading area. 1500 by mail and another 1000 by Hope Star courteous carrier boys.

The illustration we have had prepared has printed beautifully and is bound to attract the attention of our thousands of women readers.

Our advertisers, of course, practically eliminate the necessity of specially made drawings, by selecting their illustrations from our files of the Meyer Both General Newspaper Service.

Hope Star

"This is THE VERY PAINTING of your fear"

[Shakespeare, 1564-1616]

AVOID THAT FUTURE SHADOW*

By refraining from over-indulgence

You men who would keep trim and fit... you women who covet the tantalizing curves of the truly modern figure—when tempted to do yourself too well, light a **Lucky** instead. Be moderate—be moderate in all things, even in smoking. Eat healthfully but not immoderately. When your eyes are bigger than your stomach, light a **Lucky** instead. Coming events cast their shadows before. Avoid that future shadow by avoiding over-indulgence if you would maintain that lithe, youthful figure.

Lucky Strike, the finest Cigarette you ever smoked, made of the finest tobacco—The Cream of the Crop—"IT'S TOASTED." Everyone knows that heat purifies and so "TOASTING" not only removes impurities but adds to the flavor and improves the taste.

"Coming events cast their shadows before"

"It's toasted"

*Be Moderate!... Don't jeopardize the modern form by drastic diets, harmful reducing girdles, fake reducing tablets or other quack "anti-fat" remedies condemned by the Medical profession! Millions of dollars each year are wasted on these ridiculous and dangerous nostrums. Be Sensible! Be Moderate! We do not represent that smoking **Lucky Strike** Cigarettes will bring modern figures or cause the reduction of flesh. We do declare that when tempted to do yourself too well, if you will "Reach for a **Lucky**" instead, you will thus avoid over-indulgence in things that cause excess weight and, by avoiding over-indulgence, maintain a modern, graceful form.

TUNE IN—The Lucky Strike Dance Orchestra, every Saturday night, over a coast-to-coast network of the N. B. C.
